

Workforce Housing Communities Methodology

Communities with a need for workforce housing are identified through total jobs in 2017 or 2018, 5 year job growth, or long distance commuting. Data on jobs and growth are from the Minnesota Department of Employment and Economic Development's Quarterly Census of Employment and Wages¹. Data on commuting are from the US Census Bureau's Longitudinal Employer-Household Dynamics program². Workforce housing areas are defined separately for the Twin Cities Metro (7 County) and Greater Minnesota. The following sections describe the eligible communities and buffers around these communities for the two regions. Applicants will find interactive maps to identify whether a property falls within these areas at Minnesota Housing's website: www.mnhousing.gov > Policy & Research > Single Family RFP Geographic Scoring Map.

- **Top Job Centers.** A community is eligible if it is one of the top 10 job centers in Greater Minnesota or the top 5 job centers in the Twin Cities Metro as of 2017 or 2018 as defined by total jobs.

(OR)

- **Net Five Year Job Growth.** Communities are eligible in Greater Minnesota with at least 2,000 jobs in the current year that have had a net job growth of a minimum of 100 jobs, or communities in the Twin Cities Metro with a net job growth of 500 or more jobs in the past 5 years (2012-2017 or 2013-2018).

(OR)

- **Individual Employer Growth.** A community is eligible if an individual employer has added at least 100 net jobs (for permanent employees of the company) during the last five years, and can provide sufficient documentation signed by an authorized representative of the company to prove the growth.

(OR)

Long Commute Communities. A community is eligible if it has at least 2,000 jobs in the current year and is not a top job center, job growth community, or an individual employer growth community, yet is identified as a long commute community. These are communities where 15% or more of the communities' workforce travels 30+ miles to work.

In each case above, communities are buffered by 10 miles in Greater Minnesota and 5 miles in the Twin Cities Metro to account for a modest commuteshed.

Maps and tables below and on following pages display eligible areas under existing data methods for the Twin Cities Metro (pages 2-3) and Greater Minnesota (pages 4-6).

¹The 5 year job growth communities presented in this methodology are for 2012-2017 and 2013-2018. Data source: <https://mn.gov/deed/data/data-tools/qcew/>
